

COMMONWEALTH BUREAU OF CENSUS AND STATISTICSMONTHLY BULLETIN OF EMPLOYMENT STATISTICS  
(Wage and Salary Earners in Employment)

E.B.No.16.

Issued for General Information.

FEBRUARY, 1943.1. AUSTRALIA: (i) Total Males and Females Employed.

The estimated total employment of wage and salary earners (excluding members of defence forces, rural workers, and female domestic workers in private homes) was 1,873,400 as at the end of February, 1943, comprising 1,284,700 males, and 588,700 females. Males were practically unchanged from January, while females, after a month with no increase in January, resumed their normal monthly increase. The corresponding figures a year earlier, February, 1942, were 1,908,200 persons - 1,355,700 males, and 552,500 females.

The estimated numbers of wage and salary earners in employment at the end of each month since July, 1941, are shown in the following table:-

WAGE AND SALARY EARNERS IN EMPLOYMENT  
(Excluding Rural Workers, Domestic Workers in Private Homes, and Persons on Paid Strength of Defence Forces.)

At end of Month -	Year 1941-42			Year 1942-43		
	Males	Females	Total	Males	Females	Total
July	..	1,385,100	515,200	1,900,300	1,308,800	565,400
August	..	1,386,100	520,200	1,906,300	1,300,000	568,100
September	..	1,396,000	525,700	1,921,700	1,296,200	568,900
October	..	1,395,700	532,000	1,927,700	1,290,900	574,500
November	..	1,396,200	537,400	1,933,600	1,288,200	579,800
December	..	1,379,900	539,400	1,919,300	1,283,800	583,400
January	..	1,364,900	541,900	1,906,800	1,284,800	582,600
February	..	1,355,700	552,500	1,908,200	1,284,700	588,700
March	..	1,349,200	558,700	1,907,900		
April	..	1,337,400	563,500	1,900,900		
May	..	1,326,100	562,000	1,888,100		
June	..	1,320,700	563,600	1,884,300		

Total employment (excluding rural and household domestic) reached its maximum of 1,933,600 in November, 1941, just before the entry of Japan into the war. Large numbers of men were then called up for military service, and during the next two months, total employment decreased by about 27,000. During the ten months ended September, 1942, the total declined by 68,500 (6,850 per month) but over the next five months total employment has increased by 8,300.

The entry of Japan into the war meant calling large numbers of men into the Forces, so that, although substantial numbers of men were obtained from rural industries and from men who were not previously working as wage earners, employment of men (excluding rural workers) commenced in December, 1941, to decline heavily. From the end of November, 1941, to the end of February, 1943, the decrease in males employed was 111,500 averaging 7,400 per month. The variations in male employment since July, 1941, when this series of estimates was commenced may be summarised as follows. August and September showed increasing employment, 10,900 more men being employed at the end of September than at the end of July. There followed two months with steady figures; and then two months December 1941 and January 1942 with exceedingly heavy decreases, amounting to 31,300 over the two months. Regular decreases, thereafter, averaging 7,400 per month continued until December, 1942, but then ceased, remaining practically steady in January and February, 1943.

The increase in the number of females in employment has partly made up for the loss of men. During the four months, July to November, 1941, their increase averaged 5,500 per month, and during the next five months to April, 1942, 5,200 per month. There was little movement in the figures for May and June 1942. During the next three months further increases occurred, but the monthly average increase was only 1,800. In the next three months, ended December, 1942, more substantial increases, averaging 4,800 per month, were recorded, but a slight decline in January 1943, was partly made up by the extra large increase of 6,100 in February 1943.

(ii) Industrial Groups: The following statement shows the estimated changes in employment in the main industrial groups.

WAGE AND SALARY EARNERS IN EMPLOYMENT : INDUSTRIAL GROUPS  
 (Excluding Rural Workers, Domestic Workers in Private Homes and Persons  
 on paid strength of Defence Forces)

Industrial Group	July 1941	November 1941	February 1942	January 1943	February 1943	Increase(d) November 1941 to February 1943

Notes: (a) Includes Government establishments, annexes, and certain private firms engaged on aircraft and shipbuilding but excludes most private factories engaged on war contracts.

(b) Includes such public employment as does not come within the groups shown separately, e.g. administrative services, post office, school teachers, police, public works, tramways, local government, Allied Works Council, etc.

(c) Includes females engaged in mining and quarrying, shipping and stevedoring, and rail and air transport, in addition to those engaged in all other industries not shown separately for males.

(d) Minus sign signifies decrease.

/Total

Total employment in February, 1943, was 3.1 per cent. less than in November, 1941. Amongst the industrial groups, however, munitions, aircraft and shipbuilding were 79.7 per cent. above the November 1941 level - the increase in numbers of employees being 56,500 since November, 1941. Shipping and stevedoring was slightly above the level for November, 1941, and substantially above that for July, 1941, but was practically unchanged as compared with the preceding month, January, 1943. Rail and air transport in February, 1943, had 5,900 more employees than in November, 1941, but only 500 more compared with the previous month. Government n.e.i. showed practically no change from January, 1943, but employed 30,000 more than in November, 1941, due chiefly to the development of Allied Works Council operations. All other industrial groups employed fewer workers in February, 1943, than in November, 1941. Retail trade employees of both sexes declined substantially in February and, at present, employment in this industry is 18% below the November, 1941 level.

Males: Changes in the various industrial groups which have been taking place since November, 1941, may be described as follows:- Increases, munitions, aircraft, and shipbuilding, rail and air transport; Practically unchanged, shipping and stevedoring, government n.e.i.; Decreases, banks and insurance, retail trade, "all other" industries, other commerce and finance, mining and quarrying, other factories and workshops. Government n.e.i. shows higher figures than in November, 1941, but this is chiefly due to the development of Allied Works, as otherwise the figure has remained fairly steady. All the above trends were maintained in February with the exception of slight increases in other factories and workshops and "all other" industries. Banks and insurance showed no change in February compared with the previous month.

Females: Since November, 1941, the greatest increases in the numbers of females employed have been in munitions, aircraft and shipbuilding, banks and insurance, rail and air transport, and government n.e.i. Increases continued in February in all these groups, except rail and air transport. Females employed in other factories and workshops had changed only slightly from November, 1941 but in February they increased by more than 2,000. Retail trade however, continued to decline and in February, 1943 there were 6,800 fewer females employed in this industry compared with November, 1941.

Masculinity of Employees: The tendency to replace males with females is illustrated by the following figures for masculinity of employees (males per 100 females) in July 1941, November 1941, and February 1943, respectively:- Munitions, aircraft and shipbuilding, 591, 533, 251; other factories, 271, 265, 244; retail trade, 121, 115, 90; banks and insurance, 257, 224, 119; other commerce and finance, 282, 273, 219; government n.e.i., 372, 352, 280; all other industries, 181, 172, 124.

2. STATES: The table on page 4 gives a comparison of estimated employment by States, similar to that given in the preceding table for industrial groups.

In all States except Queensland and South Australia, an increase of employment between July, 1941, and November, 1941, has been followed by a decrease between November, 1941 and February, 1943. Total employment in Queensland and South Australia was approximately the same as in November 1941.

Compared with the previous month, total employment in February 1943 for all States together increased by 6,000. New South Wales and Victoria accounted for more than 5,000 of this increase. Male employment increased in all States except Queensland and South Australia. Females, however, showed substantial increases in all States.

Male Employees in February were little changed from the previous month, when the first increase appeared since the entry of Japan into the war. The largest net increase in February 1943 was recorded in munitions, aircraft etc. where increases occurred in all States except New South Wales and Western Australia. Rail and air transport showed the next largest increase which was mostly recorded in Victoria. Retail trade showed further decreases in all States compared with the previous month, January, 1943.

Female Employees showed substantial increases in all States. The most important increase was recorded in munitions, aircraft etc., and in other factories and workshops, substantial increases being recorded in all States. Government n.e.i. also showed increases in each State. The only other change of any magnitude was recorded in retail trade, which declined in all States except Victoria, where a slight increase occurred.

WAGE AND SALARY EARNERS IN EMPLOYMENT - STATES.  
 (Excluding Rural Workers, Domestic Workers in Private Homes, and Persons  
 on Paid strength of Defence Forces)

(a) Minus sign signifies decrease.

The foregoing estimates relate to total employment and are based on statistical data obtained from various sources including Pay-Roll Tax returns, and direct returns of Commonwealth Government employment.

### 3. PAY-ROLL TAX.

The collected figures for Pay-Roll returns are given without any adjustment in the appendices which are attached to this summary. The totals given are those for all employers who send regular returns to the Taxation Departments. For the small proportion of returns which are outstanding at the closing date each month, the figures of the previous month have been brought forward. The returns do not cover all employment, as employees of the Commonwealth Government are excluded, and employers who pay not more than £20 per week in salaries or wages do not make returns. Certain other classes of employers, principally religious or public benevolent institutions and public hospitals are also exempt. The proportion of all employees who are included varies from State to State on account of the different nature of the industries in the various States: but in general the proportion of employees, (other than those of the Commonwealth, and those engaged in rural industries, and female domestics in private households), who are included in the Pay-Roll Tax returns is about 90 per cent. of the estimated total of males in employment, and about 80 per cent. of the females.

Employers were classified for "industry" according to the industry in which they were considered to be predominantly engaged. As some large employers engage in more than one industry, a considerable number of employees have been included in classes to which they do not strictly belong. The following tables may be taken as indicators of trend from month to month, but not as a guide to the absolute numbers employed in the respective industries.

S. R. CARVER

MONTHLY BULLETIN OF EMPLOYMENT STATISTICS : APPENDIX 1.

PAY-ROLL TAX STATISTICS - AUSTRALIA

Number of employees stated to be on last pay-roll in the month of all employers making Pay-Roll Tax Returns.(a)
